

ENVIRONMENTAL MANAGEMENT TRAINING PROGRAMME FOR DEVELOPING COUNTRIES

OUR MISSION

We assist professionals from ministries, agencies or local government units and NGOs to improve their knowledge base and skills to actively support the environmentally sound and sustainable development of their countries.

COURSE PROGRAMME

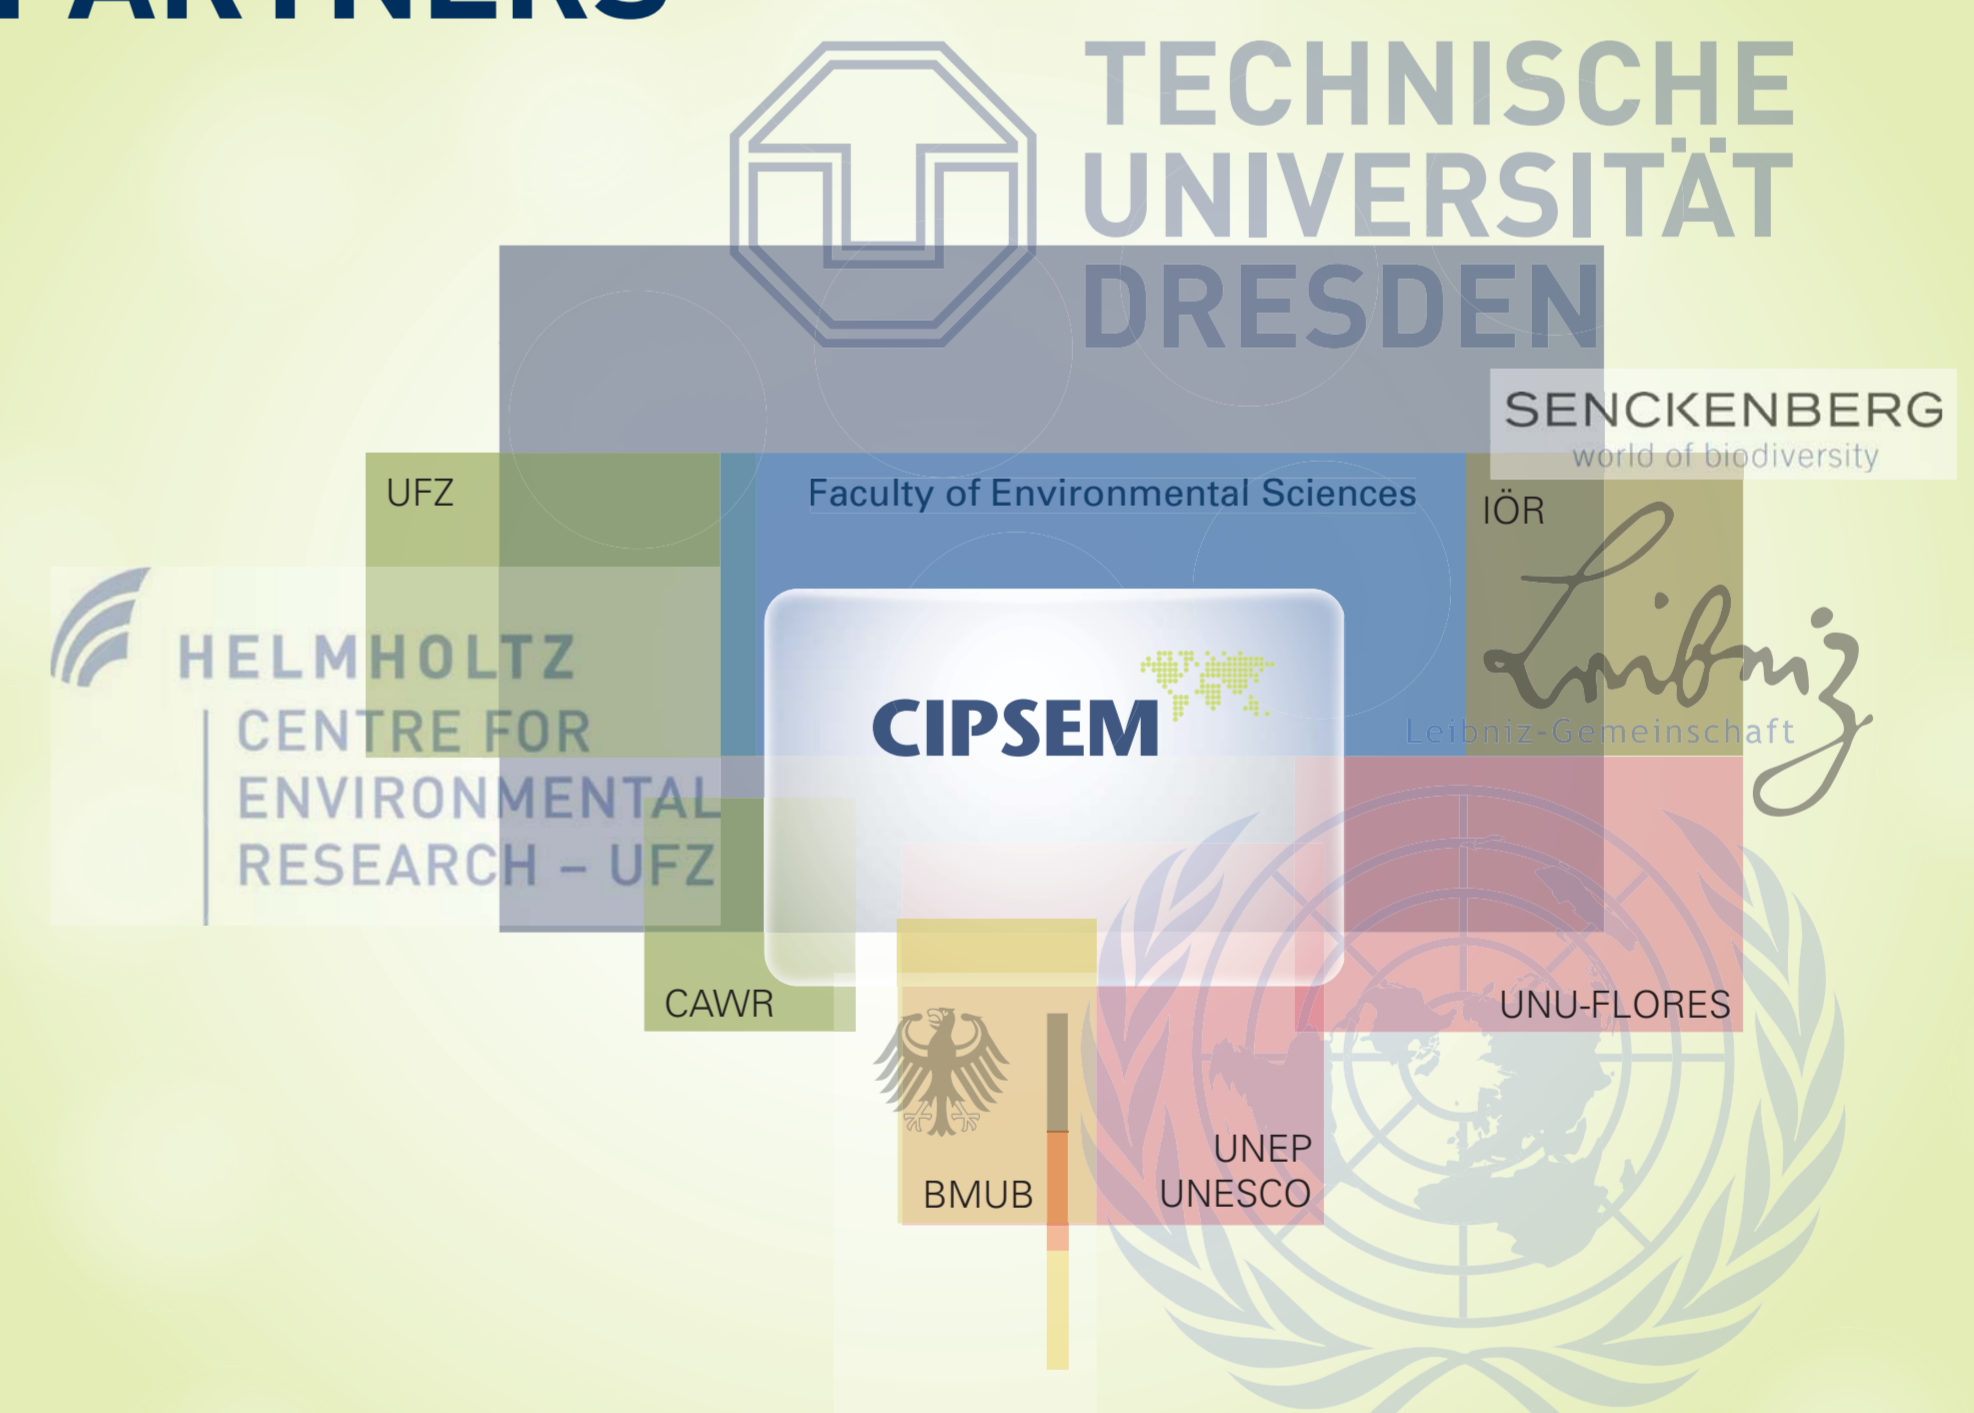

Each year we conduct:

- A six-months-course on environmental management, covering a broad range of environment-related aspects. Participants are awarded with a *Diploma of Environmental Management*.
- Three one-month short courses focusing on topics of special concern for developing countries, e.g. water, soil, waste, biodiversity, mobility, tourism, urbanization. Participants receive a *Certificate of Proficiency*.

CHARACTERISTICS OF OUR COURSES

- Our courses are designed to prepare the participants for their tasks of environment-related planning, coordination and management within ministries, agencies, local governments and NGOs of their home countries. Our course participants have several years of course relevant professional experience.
- We focus on interdisciplinary strategies and appropriate measures for a preventive and controlling protection of the environment, while taking ecological, socio-economic and cultural aspects into account.
- Close collaboration with a network of international, national and local partners. The program is funded by the German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety.

OUR PARTNERS

State-of-the-art practices and scientific excellence.

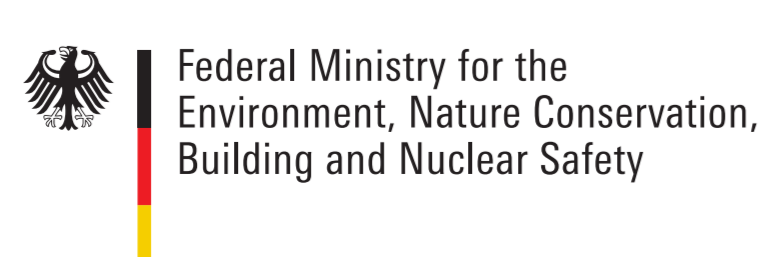

Advanced postgraduate qualification.

Intercultural experience and exchange.
