Aim of the workshop

- Discuss opportunities and challenges for transferability approaches in climate-migration studies.
- Emphasize on:
 1. Methods to translate local case study knowledge to more general information without ignoring local specifics.
 2. Requirements and challenges for transferability approaches to inform policy makers regarding climate change adaptation and migration effectively.

What means transferability?

- Transfer methods, results and conclusions from a project site to a similar site for
 - deriving generic conclusions and/or general pattern of specific factors or processes.
 - Translate local insights to larger/other regions
- Generalization

Structure of the workshop

Start	Agenda item
14:00	General introduction
14:05	Presentations Jule Thober Charlotte Wiederkehr Amirali Parpia Md Rezwan Siddiqui
14:45	Discussion
15:20	Wrap-up

Questions for discussion

Q1 What are the particular strengths and weaknesses of each approach with respect to transferability?

→ *use our cards!*

Q2 What is required from transferability approaches to actually inform (international) policy makers regarding climate change adaptation and migration?
