

Impacts World 2013 Workshop S6

From impact and vulnerability assessments to
adaptation planning and implementation

Organiser: Delphine Deryng

Friday 13 October 2017

S6. From impact and vulnerability assessments to adaptation planning and implementation

1. Reflecting on co-production approaches for robust decision making in India and Malawi (Ajay Bhave, University of Leeds, UK)
2. Sustainable Development and Adaptation in SIDS (Adelle Thomas, Climate Analytics, Bahamas)
3. The importance of land use-climate change interaction in building coastal resilience and sustainability (Sathaporn Monprapussorn, Srinakharinwirot University, Thailand)
4. Towards a coordinated national approach for adaptation planning: experiences from Benin and Senegal (Sarah D'haen, Climate Analytics, Germany)
5. Does scenario planning catalyse transformative change? Evaluating a climate change policy case study in Mali (Edmond Totin, ICRISAT, Mali)

S6. From impact and vulnerability assessments to adaptation planning and implementation

Breaking group discussion

1. Please characterise your experience in **co-production** of **scientific information** for **climate adaptation**?

- a) On which side of the spectrum do you position yourself (scientist vs policy-makers/end-users)
- b) What type of knowledge do you produce/need/use?

2. Please share the main **success** and **challenge** encountered during your experience (e.g. interdisciplinarity, communication, uncertainties & knowledge gap, relevance of information produced, project design...etc.)
3. What **lessons** have you **learned** and what could have been done differently?

S6. From impact and vulnerability assessments to adaptation planning and implementation

Success and challenge, lessons learned
